December 2010

Considering Expanding your Worship Facility or Building a New Church? Let Bruns General Contracting Assist with the Master Planning

Needing a new church is one challenge, but planning for the needs of a church 10 to 20 years from now is the real challenge. Bruns General Contracting has over 50 years experience, and has been building churches and master planning since the beginning.

What does the church expect to accomplish? Bring in new members or retain current members? Will the new multi-purpose building be used for a nursery school or youth activities gym? Does the church membership have the ability to pay for the project? Could the church meet space requirements of the project by re-purposing current space or using the same space for multiple purposes? Is there a way to renovate an existing space that will be more affordable than building or re-locating to a new facility?

Bruns General Contracting has a team of professionals on staff to help with all stages of planning. When your project is handled by an experienced church builder, a single point of contact is established which helps control the design, costs and schedule. Bruns can also help churches who need assistance raising funds for the project with their knowledge of capital campaigns.

Have the Building for Ministries Team meet with your church committee when you are in the beginning stages of planning an expansion or building a new structure to ensure the needs and budget of your church are met for the future.

**Bruns General
Contracting Tipp City,
OH**

Xenia Grace Chapel, a member church of the Church of Christ in Christian Union denomination, was constructed by Bruns General Contracting. In 1998 the small church moved from their "humble" beginnings in town to their present location at 100 Grace Drive, Xenia, Ohio 45385 and began occupying their new church facility.

Today, the average attendance is 150 to 200 people each week at their worship service. The 18,000 SF facility has class rooms, administrative space and a daycare center that is open Monday thru Friday.

The Sanctuary is a multi-purpose room, that has a court striped off and is used in a variety of activities including the annual, Upward Basket Tournament, which they have hosted for 6 years now.

The building is "capped" by a 35' steeple that has a base 8'-0" each side, and weighs approximately, 2,500 pounds.
